PROFILE STATEMENT

Computer Science undergraduate with a strong interest in Software Engineering and Full-Stack Web Development. Currently learning the MERN stack by building web applications and strengthening problem-solving skills through Data Structures and Algorithms. Seeking an entry-level Software Engineer or Full-Stack Developer role where I can contribute and continue learning.

PROJECTS

Myntra Clone

[Live Link](#)

- Developed a responsive e-commerce web application inspired by Myntra using HTML, CSS, and JavaScript.
- Implemented product listing, category navigation, shopping bag functionality, and responsive user interfaces.
- Used JavaScript DOM manipulation and event handling to create interactive user experiences.
- Organized the project using Git and GitHub for version control and source code management.

Image Gallery Web App

[Live Link](#)

- Built a fully responsive image gallery with category-based filtering, a custom lightbox viewer, and keyboard navigation — using only vanilla JavaScript (no frameworks/libraries)
- Implemented smooth CSS Grid/Flexbox layouts that adapt across desktop, tablet, and mobile breakpoints
- Added accessibility features including keyboard-focusable gallery items and ARIA labels for screen reader support
